

PROFILE

A resourceful Full Stack Developer who can work effectively within a team or individually to achieve tasks in a remote environment and is interested in opportunities for technical growth and improvement.

SKILLS & TECHNOLOGIES

- TypeScript & JavaScript
- GraphQL
- GitHub & BitBucket
- React & React Native
- AWS Amplify
- Jira
- Angular
- Node.js
- Agile

EXPERIENCE

REMOTE FULL STACK DEVELOPER, GRAVOC

MAY 2022 - PRESENT

- Develop clean reusable solutions in TypeScript, JavaScript, or React Native depending on the project's tech stack.
- Ensure features or bug fixes work as expected and provide an intuitive user experience.
- Resolve bugs in a timely manner and improve broken code using best coding practices whenever possible.
- Use numerous AWS tools including AWS Lambdas, AWS SES/SNS, AWS Cloudwatch, AWS API Gateway, and AWS DynamoDB in order to provide reliable and scalable solutions for the client's software.
- Work with other Full Stack Developers to conceptualize scalable and optimized solutions in the front or backend environments.
- When necessary, update and create fields, interfaces, or types in GraphQL schemas.
- Create, deploy, and test AWS Lambdas using the AWS CLI or web console.
- Utilized AWS SES and SNS for one project to send out automated email and SMS messages to their user base. Also added multiple layers of security by checking the user's date of birth and dynamically creating unique tokens that are used when querying or mutating user notification settings.
- Designed and created a cost-savings calculator to compare costs against competitors for a client using Vanilla JS, HTML, and CSS. Regularly met with the client to demo development progress and record customer feedback.

FRONT END SOFTWARE DEVELOPER, C SQUARED SYSTEMS

AUGUST 2021 - MAY 2022

- Managed and maintained user role permissions project that is utilized by C Squared Systems' larger software application.
- Refactored and developed TypeScript code with clean solutions on a large-scale application to ensure product scalability.
- Collaborated with senior software developers to address and resolve urgent bugs in different customer environments - resolved over 50 high-priority bugs in 3 month period.

- Produced accurate time frame estimates to complete Jira tasks as well as provided task updates to the team and supervisor.
- Confirmed all unit tests pass on code alterations to create reliable customer-facing software.
- Reviewed code for logical errors and readability issues with fellow developers.
- Worked efficiently as part of a team or individually to complete tasks.

REMOTE FULL STACK DEVELOPER, BLACKBURN LABS

JULY 2020 - JULY 2021

- Designed, developed, and tested new features for multiple React applications, both internal and external facing, using Node.js as the backend environment
- Apply Object Oriented concepts and principles to software development
- Attended daily Agile scrum meetings and provided progress updates to supervisor

RELEVANT TRAINING

- AWS Cloud Practitioner
- PluralSight TypeScript
- PluralSight SQL

EDUCATION

Southern New Hampshire University, Manchester, NH – B.S in Computer Science, 2021
